

Critical Success Factors – of the Camelid Companion Certification process

A ‘No Charge’ program! The fee you send in is for your certificate.

The CCC process can take place anywhere a Certifier is present – events, shows, 4-H etc.!

SCORING

- Each level has 8 tasks
- Please read the pass/fail and task criteria **BEFORE** scoring – an “almost or close pass” is a “no pass”
- We cannot pass animals that do not do the task willingly
- Scoring is pass/fail – must have an equivalent to a scoring of 10 to pass (refer to CCC docs for pass/fail)
- Once a task is completed three times, future trials can eliminate that task
- If external circumstances impact the performance of a task, it can be repeated
- Certifiers must complete a sign off for each task as they are completed
- Animals must pass each task three times under two different certifiers on two different days
- An animal must pass a lower level before proceeding to the next level
- Owners are responsible for keeping their own scoresheets until completed
- Once scoresheets are complete they are sent into the ILR office with \$15.00 and you can print your own certificate; or, for \$20, the office will issue the certificate
- Animals can only receive credit for one pass of each task for events held on the farm on which they live

CERTIFIERS

- Certifiers may not certify any animal they own or handle
- Certifiers must be ILR members
- ILR Judges simply need to read the requirements of CCC and sign off on the certification statement form; other certifiers must read, sign and have a recommendation signature from either an ILR judge, ILR Board Member or CCC committee member
- The ILR office will keep a listing of all certifiers and certification statements

OTHER

- Owners are responsible for maintaining their scoresheets
- Once the scoresheet is sent to ILR, the points will automatically be added to the UAP program
- Points for the CCC are Level 1 = 5; Level 2 = 10; Level 3 = 15
- Completion of Level 3 earns the animal a UAP Level of Achievement status
